

1B ASSURANCE AG

Insurance for the risks of tomorrow.

1B Assurance AG is an international insurance technology company focused on emerging risk, operating as a Managing General Agent. We build the underwriting capability for exposures the market has not yet learned to hold.

ABOUT 1B

1B builds insurance for robotics and humanoid machines, autonomous systems, AI and digital assets, combining underwriting expertise with technology, data and continuous risk intelligence.

1B takes the other route: build the visibility first. Verify the architecture that carries the risk, instrument it, keep the picture current, and place capacity against an exposure that is actually understood. That is a different business to conventional insurance, and it requires a different kind of company.
